***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 23<sup>rd</sup>, 2004 has been entered.

***Response to Arguments***

2. Applicant's arguments with respect to claims 1, 3-21, and 23-30 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-21, and 23-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Griggs (U.S. PG Pub No. 2002/0029384) in view of Sako et al (U.S. PG Pub No. 2002/0128936)

Art Unit: 3621

5. As per claims 1, 9, 10, 19, Griggs teaches a method of distributing a document of a user comprising, receiving a distribution request of the document for the user, compiling a list of distribution options for the document based on the document distribution service of the document providers and presenting the list of the distribution options for the document to the user (*see abstract, fig 1A-9, column 0037, 0040, 0043, 0048, 0049*). Griggs fails to teach an inventive concept of registering document distribution request service of a plurality of document distribution providers. However, Sako et al teach registering document distribution request service of a plurality of document distribution providers (*see paragraph 0036*). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the inventive concept of Griggs to include Sako et al's registering document distribution request service of a plurality of document distribution providers because this would have facilitate content distribution to user.

6. As per claims 3-8, 11-18 and 20, 21 and 23-30, they disclose the same inventive concept as claims 1, 9, 10 and 19. Therefore, they are rejected under the same rationale.
